Profile Summary

Front-End Developer with 2+ year of experience in building responsive, high-performance web applications using React, JavaScript, and modern styling frameworks like TailwindCSS. Strong focus on UI/UX, performance optimization, and teamwork. Passionate about learning and contributing to real-world projects.

Education

- Diploma in Computer Programming** Dey 2021 - 2024
Branch: Programming
Institute/School: Shahid Avini
Tehran, Iran
GPA: 19:85
- Bachelor of Engineering Sciences** Dey 2024 - Present
Branch: Computer
Institute/University: Roudehen University
Tehran, Iran

Work Experience

- React js** January 2023 - June 2024
Virasgal Karo Company
Tehran, Iran
Tasks and Achievements
I worked as a Front-End Developer at Virasgal Company for six months. During this time, I was involved in a large-scale project that consisted of multiple management and user panels. This project provided me with an excellent opportunity to strengthen my technical skills in designing user interfaces, implementing responsive components, and working with modern front-end frameworks such as React.
Throughout the project, I faced several challenges, including proper code structuring, state management, effective communication with the back-end team, and optimizing page performance. These challenges helped me gain a deeper understanding of software development in a real-world professional environment.

● **Front end developer**

July 2024 - July 2025

parspardaz

Tehran, Iran

Tasks and Achievements

Over the past month at Pars Pardaz Company, I worked on designing and developing a fully modern portfolio website for a single individual using React. This project involved implementing an advanced user interface and creating an admin panel that allowed that individual to easily upload and manage their portfolio items.

The backend of the website was developed using WordPress, and we utilized WordPress's REST API to enable smooth and effective communication between the front-end and back-end. This architecture allowed us to develop the front-end independently with modern technologies, while WordPress handled content and data management.

Throughout the project, I encountered challenges such as data management, synchronization between the admin panel and the website, and optimizing site performance. These challenges significantly enhanced my skills in working with React, WordPress, and APIs. This experience gave me a deeper understanding of web development in real-world projects and the integration of diverse technologies.

Skills

React	Next js
Redux	git
GitHub	Figma Software
tailwindcss	TypeScript
Responsive	react query
mui	sass
styled-components	rest api

Language

- **English** : Intermediate

Courses and
Certifications

● **6-Month Front-End Web Design Course**

May 2022

Institute: Technical Complex of Tehran

● **React js**

Institute: Technical Complex of Tehran

Projects

- **Portfolio**

This is my personal project where I have used React, Tailwind CSS, and the AOS and MUI libraries. The website is designed to be multilingual, and I implemented its multilingual functionality using the i18n library.

- **Construction Materials of Ahanehfar**

The website I designed was built with WordPress and focuses on the sale of construction iron materials. In this project, I used various plugins including Elementor for page design and WooCommerce for managing sales and organizing iron products in tables. Additionally, I utilized JetEngine to implement advanced content management features.

I also employed different SEO tools to optimize the website and improve its visibility in search engine results.

- **Photography & Graphic Design Lumion**

For: React js

This website is a portfolio built with React, utilizing the AOS library for appealing animations. It features a custom admin panel that allows the user to add, delete, or edit their portfolio items. To access the panel, the user must enter their credentials and authenticate successfully. The panel's backend is connected to WordPress and uses WordPress REST APIs for communication between the front-end and back-end. Additionally, a login system has been implemented to secure the panel.
